

BOLTON

ANTIPOLLUTION SYSTEMS

Bolton Teknik / Bolton Antipollution System is one of the leading air pollution control contractors in Indonesia, with several years of experience in the design / fabrication / installation of successful complete Air - Pollution - Control systems for application in various industries, such as timber and woodprocessing plant, food factories, paint shops, plastic factories, chemical plant, electronic factories, plywood, ceramic, moulding, furniture, palm oil, sugar, steel mill, metal industries, coal, oil power station boilers, pigment, carbon black ink dyes rubber, pharmaceutical, batteries wet / dry, FRP, plating / chroming, feed meal, pesticides, herb, flour, milk, food, tobacco, coffee / tea, cement, koalin, asphalt, abestos, activated clay, detergent, soap acrosol, pulp paper, electronic PCB.

Besides undertaking turnkey projects for air pollution control systems, with our knowhow and facilities, we are also able to supply the following individual units for your needs.

* **Industrial Fans :**

- Heavy duty centrifugal fan with single or double inlets, available with both forward and backward curved impellers.
- Axial Fans with cast aluminium or plastic impellers.
- Roof extractor fans.
- Special fans such as explosion proof construction, driven by air-motor, high temperature application etc made to customer requirements.

* **Silencers of round or rectangular type, made to customer requirements.**

* **Portable Dust Collectors, pulse-jet collectors and shaker collectors.**

* **High efficiency cyclone units.**

* **Fume scrubbers.**

* **Oil mist collectors.**

* **Spray booth.**

* **Flexible Conveyer for granular and powder form material.**

* **Ducting of round or rectangular type made of Mild steel, Galvanized steel, PVC, ABS, PP, PE, PVDF etc.**

* **Timber drying systems operated using electricity or steam.**

We provide baghouse filters, cyclones, portable dust collectors, centralised vacuum systems and spray booths. Systems and equipment are designed and made to your specific pollution problems at economical cost.

We provide all types of Industrial fans.

- Heavy duty centrifugal fans
- Axial fans
- Roof fans
- Special fans made to customer's specifications.

We design, fabricate & install dust collection systems, ductings and conduit-pipes in various material to your specifications :
